CAPTAIN PITTS /DERRICK

My name is Derrick Pitts. I'm the Captain of TFI 1138 Fleet Command group from Philadelphia. I boarded this ship in 1976, when I was a much younger man.

I have been lost in space for 20 years. (pause) The future needs your help.

In the year 2525, a catastrophe occurred. Our universe smashed into an upside down universe.

Every few minutes, human beings "leap" to a different dimension. We move alone.... And without reason.

The space/time continuum has ceased to exist.

These six numbers can restore the balance of the universe (holds up old, folded yellowed faded paper we saw in first shot),

but there is a 7th that is missing.

To unify space and time, you need to find the missing element.

Looks around himself, as if seeing that he's leaping
